BATH FITTINGS

LUXURY REDEFINED

Product Catalogue

Series of brass bath fittings, kitchen
fittings, showers, couplings, connections and floor drainage

TUTEJA INTERNATIONAL

Fittings made to be lived with, not replaced

Colour's is the bath fittings house of Tuteja International, a family-run manufacturer of brass taps, mixers and kitchen fittings. Faucets in this catalogue are made in our own works, from casting and machining through buffing, plating and assembly, so a single team answers for how a tap feels in the hand and how it behaves five years later.

The range is built around the fitter, not the showroom. One family of bodies, one cartridge standard, one plating quality. Many series differ in handle and form, so a builder can specify a whole floor from one page and a retailer can stock deep instead of wide.

Bodies are brass. Working parts are ceramic disc cartridges in Z-type, A2, rising fitting and full turn phase, chosen because a disc cartridge holds its quarter-turn feel long after a washer tap has begun to weep. Every fitting is finished in chrome plating (CP), polished to a mirror and plated for hard-water service.

Prices in this book are MRP in Indian rupees. Trade terms, packing details and part availability are confirmed at the time of order.

20+

Series of faucets and mixers, from the Turbo range to Florentine

22+

Item types per series: bib cocks to single-lever basin mixers

7 years

Warranty on faucet bodies; one year on cartridges

Contents

Faucet series carry full item and price tables. Allied products are listed with names; rates on request.

HOW TO READ A PAGE

Each series opens with its cartridge type and inlet size, followed by representative pieces and the full item table. Item codes are ours: quote the code and the series name when ordering, e.g. FLR-WB, *Florentine Wall Mixer with Band*.

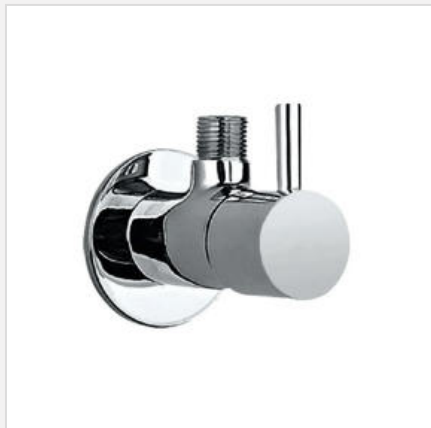

PRICES

All figures are maximum retail price in Indian rupees, per piece, chrome plated finish. Photographs are representative; fittings are supplied as specified in the item table.

OWNER'S NOTES

Care, quality and warranty

CARE OF CHROME PLATING

- Wipe with a soft damp cloth and dry. Water left standing on plating is what dulls it, not use.
- Never use acid cleaners, bleach, scouring powder or a scrubbing pad on a plated surface.
- Flush the line before fitting. Grit from new pipework is the commonest cause of a dripping cartridge.
- Tighten by hand onto thread tape; a pipe wrench on a plated body will mark it.
- In hard-water areas, clear the aerator every few months; it unscrews by hand.

WARRANTY

7 yr

On the faucet body against manufacturing defects in casting, machining and plating.

1 yr

On ceramic disc cartridges and moving parts, replaced free of charge in that period.

Warranty runs from the date of purchase against the retailer's invoice and covers the fitting itself, not installation. It does not extend to damage from scale, grit, abrasive cleaners, or forcing of handles and threads.

ORDERING

Quote series name and item code.
Minimum order and packing confirmed at order stage.

PRICES

MRP per piece in Indian rupees, chrome plated. Subject to revision without notice.

ALLIED PRODUCTS

Rates for couplings, connections, showers, jalis and health faucets on request.
